REFLEXIVE

Unpacking what these technical inputs mean in own country contexts

The NAP Conversation

Implementation

The NAP process is **MORE** than plans, strategies, frameworks, institutional arrangements, etc.

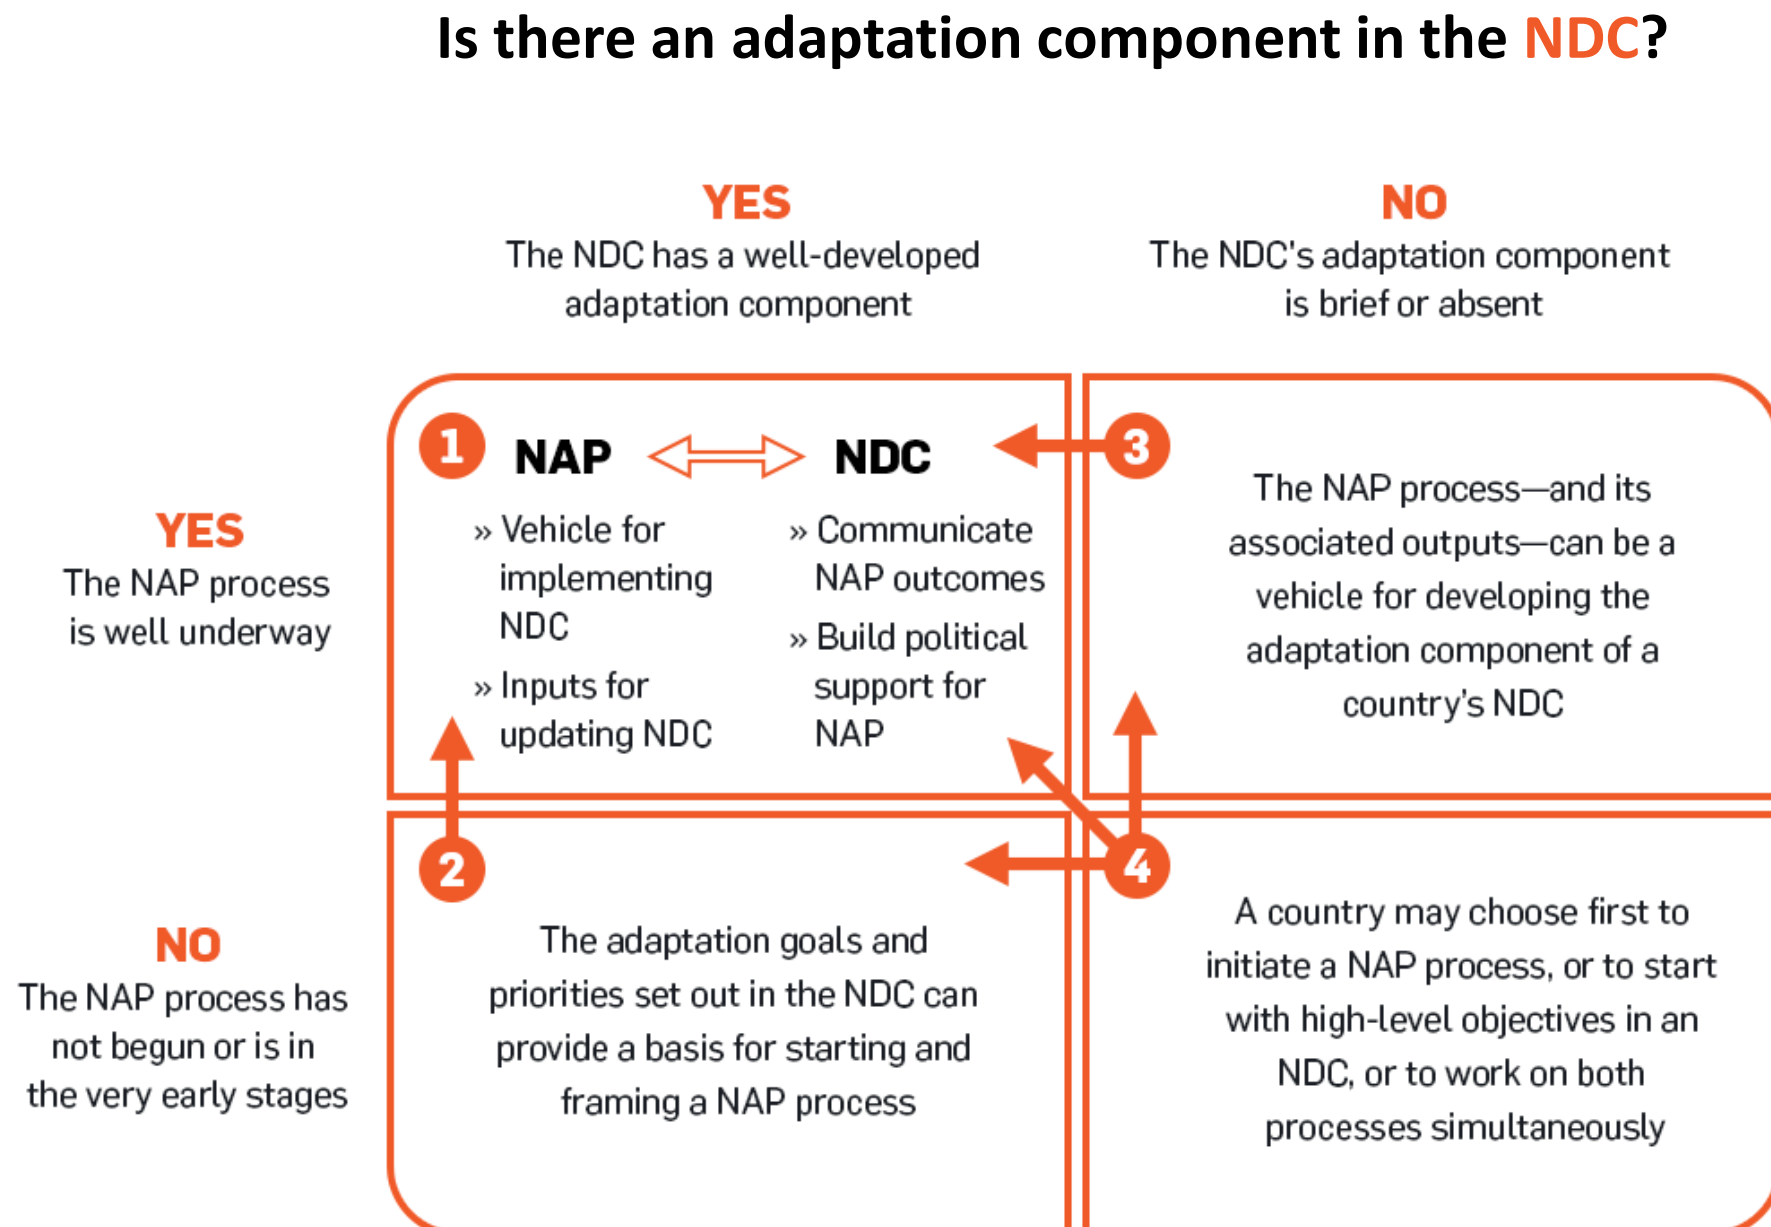

- What are the capacities / resources needed to help with that transition (or leap?) from planning to action?

Link to NDCs

NAPs as important mechanisms for achieving NDC-A goals

Is there a **NAP process** underway?

Link to SDGs

SDGs: 17 goals, 169 targets to be translated into national and subnational plans

SDGs will **frame** development visions, priorities

Strong **alignment** between SDG targets and adaptation goals / actions

Goal 2: End Hunger, achieve food security and improved nutrition, and promote sustainable agriculture

- Climate smart agriculture;

GCF decision

June 2016 Board decision to provide up to USD 3 million per developing country for “the formulation of national adaptation plans and/or other national adaptation planning processes”

- Via the GCF Readiness and Preparatory Support Programme
- Separate and additional to existing readiness funding (USD 1 million / year / country)
- Enhance or build on existing adaptation planning processes
- Don't need to use it in one go...
