Coordinating  
Climate-Resilient  
Development

**National M&E of Adaptation:  
Context**

# What is context?

- Policy framework of adaptation
- Purpose of the M&E system
- Level of application & aggregation
- Existing structures for M&E or data collection

# Policy framework

## Is there a mandate?

- Climate change plans or policies addressing adaptation -- include M&E
  - **Jamaica**: CC Policy Framework
  - **Kenya**: National CC Action Plan
  - **Grenada**: Dedicated PoA on M&E in NAP
- Discrete government mandate
  - **Morocco**: Environmental Charta (decentralizing environmental policy & planning)
- Robust national M&E policy into which M&E of adaptation will feed

# Purpose

Why do M&E, how will results be used?

- **Learning:** Understanding the evolving adaptation context, needs and experiences – what is working? Why?
  - **Norway:** Learn by doing system
- **Accountability:** Demonstrating effective allocation and use of resources
  - Developing countries & donors
- **Adaptive management:** Determining if a policy, plan or intervention is delivering adaptation results, adjusting accordingly

Can do all three – but is there an emphasis?

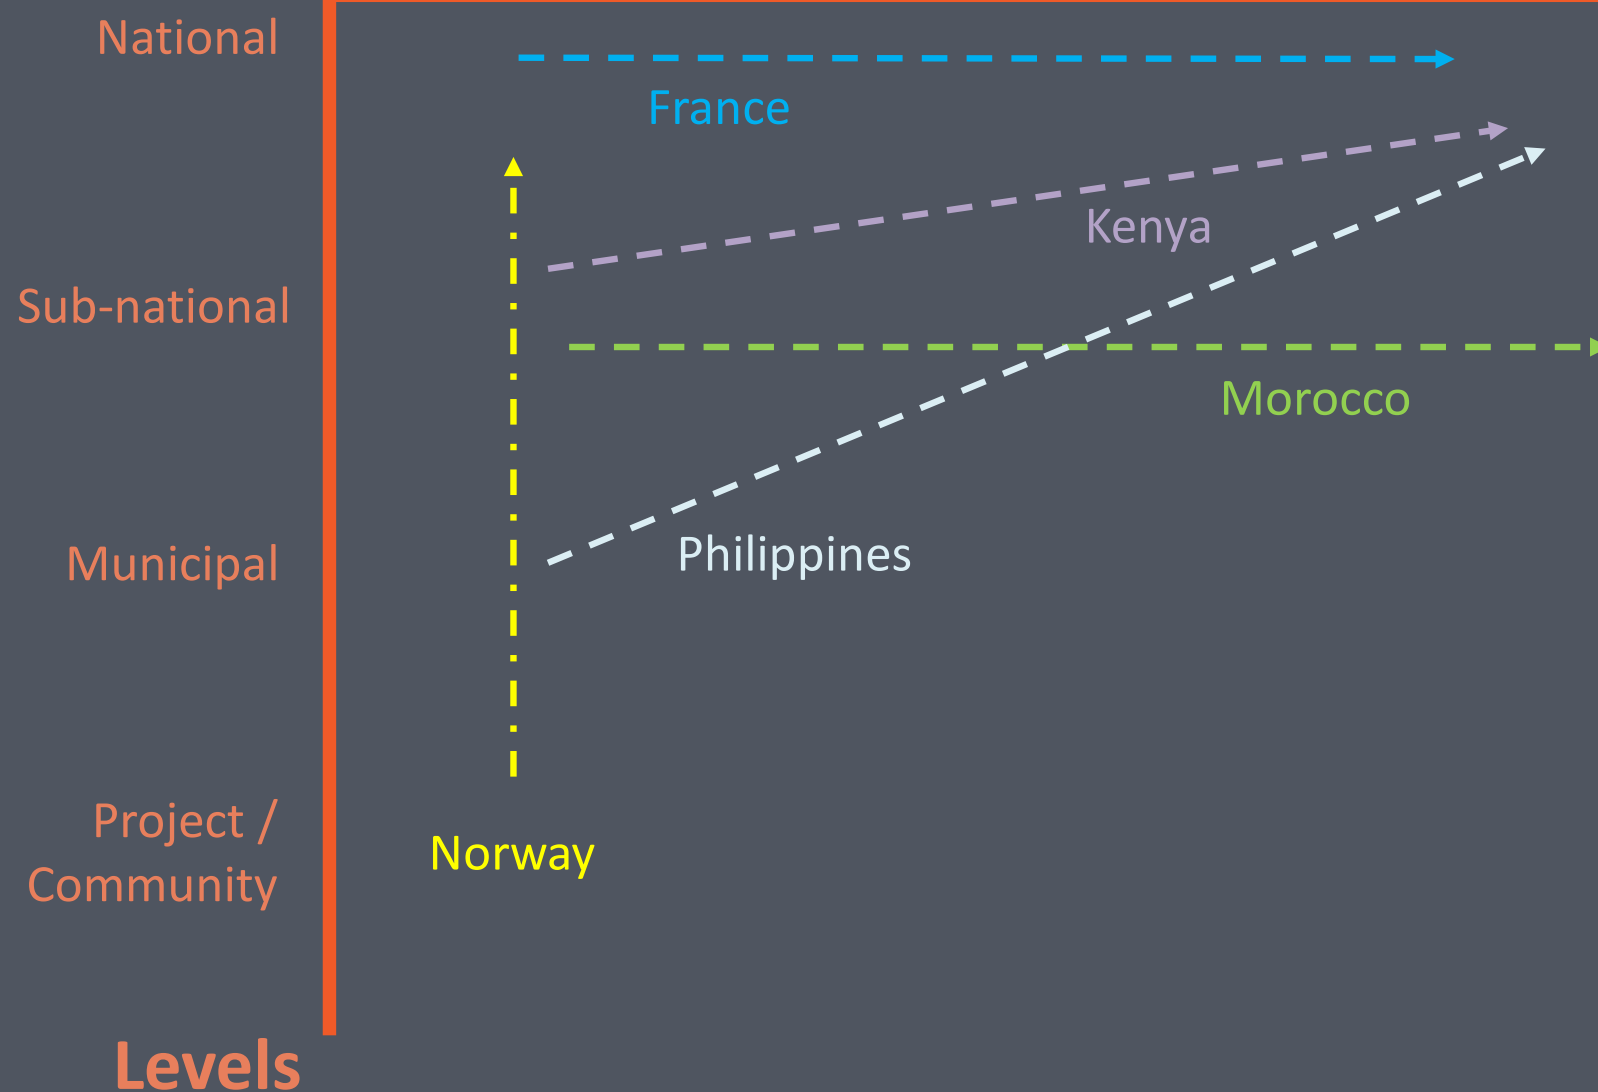

# Scales

From where will data / information be collected?

## Sectors

Agriculture, Water, Tourism, Infrastructure, Health

# Existing structures

Are there existing institutional M&E structures into which M&E of adaptation can be integrated?

- **Grenada:** Build on M&E framework for Implementation Plan of Regional CC Framework
- **Albania:** Build on existing indicators in the National Strategy for Development & Integration
- **Kenya:** National Integrated Monitoring and Evaluation System (NIMES)
- **Malawi:** National M&E framework

Challenge of coordination

Are these structures operational / working?
