

TTF Session 1. Participatory Exercise: Setting the Context/What has happened since the last TTF

D1. AVO 1.20.17

- **Objective:** participatory identification of key events and milestones in the broad CC context, and in M&E in particular. It will provide the 'bigger picture' for M&E of adaptation in the country/highlighting that it does not take place in a vacuum but need to have a holistic perspective.
- **Methodology:** Move from the general to the specific. Draw a timeline and place it on the wall, indicating the months since the last TTF until now.
 - Each participant is given 3 post-its of each color, and is asked to answer the questions below.
 - One idea per post-it, **max 3 post-its per participant, for each round**, so they are forced to prioritize
 - Ask participants to write their COUNTRY in each post-it, so we can have a more clear picture of the differences/similarities

Since the last TTF (MARCH 2016):

- Key events or developments (at INTERNATIONAL level) that have influenced the cc adaptation agenda in your country? [write, then place in the month that corresponds, on the wall]
- Key events or developments (at NATIONAL level) that have influenced the cc adaptation agenda in your country? [write, then place in the month that corresponds, on the wall]
- Key milestones achieved in regards to CC Adaptation/NAP process [write, then place in the month that corresponds, on the wall]
